

Sanjit Kulkarni

Unity Game Developer

+91-8291598942 | sanjit.kulkarni.2018@gmail.com | Mumbai, India

Portfolio: admiralxeon.github.io/SanjitK | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Unity Game Developer with 4+ years of experience specializing in AR/VR, Web3, and mobile game development. Proven track record of delivering high-performance games with 30% engagement increase through innovative blockchain integration and optimized AR systems. Expert in cross-platform deployment and mentoring development teams.

TECHNICAL SKILLS

Game Development: Unity3D (Expert), Unreal Engine, Roblox Studio, C#, C++, Game Design Patterns, OOP

Specializations: Mobile Games (Android/iOS), AR/VR (Vuforia, AR Foundation), Web3 & Blockchain Integration

Web3 & Blockchain: Smart Contracts, NFT Integration, Solidity, Web3 SDKs, Crypto Payment Gateways

Tools & Frameworks: Git, Netcode for GameObjects, REST APIs, WebGL, Android SDK, Meta Quest

PROFESSIONAL EXPERIENCE

Senior Game Developer

January 2023 – Present

Coincade Studios

Mumbai, India

- Architected 2D Web3-integrated car racing game with blockchain transactions, smart contracts, and real-time NFT rewards, achieving 30% increase in user engagement through dynamic leaderboard mechanics
- Deployed game on Android and WebGL, optimizing performance by 20% through advanced profiling and asset optimization
- Integrated secure crypto payment gateways and Web3 SDKs enabling seamless blockchain-based asset ownership
- Collaborated with blockchain developers to implement transparent game economy mechanics using smart contracts

Software Engineer (Unity)

June 2022 – January 2023

Augurs Technologies Pvt Ltd.

Lucknow, India

- Spearheaded AR-based insurance prototype achieving 30% improvement in user interaction through optimized image recognition and animated policy visualization using Vuforia
- Engineered real-time image scanning system reducing detection lag by 40% and enhancing dynamic target tracking
- Developed interactive AR experience with real-time physics simulation, increasing user engagement by 25%
- Optimized AR rendering pipeline ensuring smooth 60 FPS performance on mid-range mobile devices

Game Developer

February 2021 – June 2022

BYJU'S Future School

Mumbai, India

- Designed and developed 5+ Unity games with educational storytelling and physics-based challenges for 1000+ students
- Mentored 10+ student teams improving project completion rates by 40% through structured curriculum and agile workflows
- Mastered Roblox Studio in 2 months, leading student-driven projects that enhanced gamified learning outcomes
- Created comprehensive game development curriculum covering Unity, C#, game design, and project management

EDUCATION

Post Graduate Program in Game Development

2018 – 2021

G.A.M.E Institute (Game Art, Multimedia & Education)

Bachelor of Engineering in Information Technology

2015 – 2018

Mumbai University

KEY ACHIEVEMENTS

- Pioneered Web3 integration in production games with 30% increase in user engagement and seamless NFT distribution
- Reduced AR detection lag by 40% through optimization of computer vision algorithms and efficient architecture
- Improved student project completion rates by 40% through effective mentoring and curriculum innovation
- Achieved 20% performance optimization on cross-platform deployments (Android, WebGL)

CORE COMPETENCIES

Leadership: Cross-functional collaboration, Technical mentoring, Code reviews, Agile development

Technical: Performance optimization, System architecture, Debugging, Algorithm design, CI/CD

Soft Skills: Team leadership, Stakeholder communication, Technical documentation, Problem-solving
